AI/LLM	Prompt Engineering, LangChain, Hugging Face, Generative AI
Software Engineering	SDLC, Agile, Debugging, Software Development Methodologies, Component Design
Web Technologies	Technical SEO (Next.js), REST APIs, Responsive Web Design
DevOps / CI-CD	Docker, GitHub Actions
Developer Tools	Github , Visual Studio , Figma , Jira

PROJECTS

EasyService - Searvice based platform: [gitHub](#)

- Developed a full-stack MERN service marketplace platform with JWT authentication, role-based access control (Admin, Shop Owner, User), and scalable REST APIs.
- Implemented real-time chat (Socket.io), worker assignment, order management, and Razorpay payment integration to streamline service booking and management.
- Implemented an AI-powered recommendation system with a responsive and user-friendly interface.

UniGen-AI – Multimodal AI Content Generation Platform [gitHub](#)

- Developed a full-stack AI content generation platform using Node.js, integrating LangChain and Hugging Face APIs to generate AI-powered text and images from user prompts.
- Built scalable LLM-based content generation workflows with a responsive interface, enabling efficient prompt processing and multimodal content creation.

ShoeVerse - Emphasizes focus on footwear: [gitHub](#)

- Developed a full-stack MERN e-commerce platform with JWT authentication, role-based access control (Super-Admin, Seller, User), and Redux state management.
- Integrated Razorpay payments and implemented Seller KYC, product management, and order tracking for secure and scalable e-commerce operations.
